PART III: PROCUREMENT IN THE CONTEXT OF PROJECTS FINANCED BY THE NORWEGIAN AGENCY FOR DEVELOPMENT COOPERATION

1 INTRODUCTION

- 1.1 This Part III sets out procurement rules and principles which shall be applied by the Grant Recipient when procuring goods, services or works to Projects financed by the Norwegian Agency for Development Cooperation (Norad). Stricter rules may supplement the compulsory minimum rules set forth in this Part III.
- 1.2 Norad may carry out ex post checks on the Grant Recipient's compliance with the rules set forth in this Part III.
- 1.3 Failure to comply with the rules set forth in this Part III shall render the Project expenditure ineligible for Norad funding and may lead to withholding funds or claim for repayment in accordance with article 17 of the General Conditions (Part II) of this Agreement.
- 1.4 Contracts shall not be split artificially to circumvent the procurement thresholds. All monetary amounts referred to in this Part III are amounts excluding value-added tax (VAT).
- 1.5 The procurement provisions shall also apply to any procurements to be carried out by the Grant Recipient's cooperation partners or others. The Grant Recipient shall be responsible for compliance as per article 11 of the General Conditions (Part II) of this Agreement regardless of whether the procurement is carried out by the Grant Recipient itself or its cooperation partners or others.
- 1.6 Sections 1 to 4 set out rules, which shall apply to all contracts. Sections 5 to 6 contain specific rules for service, supply and works contracts. Section 7 lists the situations where a negotiated procedure without prior publication is permitted.

2 BASIC PRINCIPLES

- 2.1 If a Project requires procurement by the Grant Recipient, the contract must be awarded following a tender procedure to the most economically advantageous tender (i.e. to the tenderer obtaining the best score based on price and quality), or, as appropriate, to the tenderer offering the lowest price. In doing so, the Grant Recipient shall avoid any conflict of interests and respect the following basic principles:

B Buy

- a) **Competition:** The procedures applied and the award of contracts shall be based on fair competition.
- b) **Equal treatment and non-discrimination:** Participation in tender procedures shall be open on equal terms to all natural and legal persons. During the entire procurement and the award of contracts, the Grant Recipient shall not discriminate against candidates/tenderers or groups of candidates/tenderers.
- c) **Transparency and ex-ante publicity:** As a general rule, tender procedures shall be based on prior publication. Where the Grant Recipient does not launch an open tender procedure, it shall justify the choice of tenderers that are invited to submit an offer.
- d) **Objective criteria:** The Grant Recipient shall evaluate the offers received against objective criteria, which enable the Grant Recipient to measure the quality of the offers and shall take into account the price (the offer with the lowest price shall be awarded the highest score for the price criterion). The criteria shall be set out beforehand and shall be relevant to the contract in question.
- e) **Notoriety:** The Grant Recipient shall keep sufficient and appropriate records and documentation with regard to the procedure, its evaluation and award.

3 ELIGIBLE TENDERERS

3.1 Tenderers must provide information on their legal form and ownership structure.

3.2 Tenderers shall be excluded from participation in a procurement procedure if:

- a) they are bankrupt or being wound up, are having their affairs administered by the courts, have entered into an arrangement with creditors, have suspended business activities, are subject of proceedings concerning those matters, or are in any analogous situation arising from a similar procedure provided for in national legislation or regulations. However, tenderers in this situation may be eligible to participate insofar as the Grant Recipient is able to purchase supplies on particularly advantageous terms from either a supplier which is definitively winding up its business activities, or the receivers or liquidators of a bankruptcy, through an arrangement with creditors, or through a similar procedure under national law;
- b) they or persons having powers of representation, decision-making or control over them have been convicted of an offence concerning their professional conduct by a final judgment;
- c) they have been guilty of grave professional misconduct; proven by any means which the Grant Recipient can justify;
- d) they have not fulfilled obligations relating to the payment of social security contributions or taxes in accordance with the legal provisions of the country in which they are established, or with those of the country of the Grant Recipient or those of the country where the contract is to be performed;

B
TMM

- e) they or persons having powers of representation, decision-making or control over them have been convicted for fraud, corruption, involvement in a criminal organisation or money laundering by a final judgment;
- f) they make use of child labour or forced labour and/or practise discrimination, and/or do not respect the right to freedom of association and the right to organise and engage in collective bargaining pursuant to the core conventions of the International Labour Organization (ILO).

3.3 Tenderers shall confirm in writing that they are not in any of the situations listed above. Even if such confirmation is given by a tenderer, the Grant Recipient shall investigate any of the situations listed above if it has reasonable grounds to doubt the contents of such confirmation.

3.4 Contracts shall not be awarded to tenderers which, during the procurement procedure:

- a) are subject to a conflict of interests;
- b) are guilty of misrepresentation in supplying the information required by the Grant Recipient as a condition of participation in the tender procedure, or fail to supply this information.

4 **GENERAL PROCUREMENT RULES**

4.1 The tender documents shall be drafted in accordance with best international practice. The Grant Recipient may voluntarily use the models published in the Practical Guide on the EuropeAid (EU) website.

4.2 The Grant Recipient shall take into account universal design and the potential environmental impact of any planned procurements.

4.3 All invitations to submit tenders shall state that offers will be rejected if any illegal or corrupt practises have taken place in connection with the award. All contracts concluded under the Project shall state that the Grant Recipient may terminate the contract if it finds that illegal or corrupt practises have taken place in connection with the contract award or execution.

4.4 The time-limits for receipt of tenders and requests to participate must be sufficient to allow interested parties a reasonable and appropriate period to prepare and submit their tenders.

4.5 An evaluation committee must be set up to evaluate applications and/or tenders of a value of NOK 500 000 or more on the basis of the exclusion, selection and award criteria. This committee must have an odd number of members, at least three, with all the technical and administrative capacities necessary to give an informed opinion on the tenders.

B
Buz

- 4.6 For contracts with a value exceeding NOK 100 000, the Grant Recipient shall compile a written record with documentation of all assessments and decisions during all steps of the procurement process from the planning stage until the signing of the contract. Upon request by Norad, the Grant Recipient shall deliver its written record to Norad and grant Norad access to all relevant information and documentation related to the procurement procedure and practices applied.

5 AWARD OF CONTRACTS

- 5.1 Contracts with a value of less than NOK 500 000 may be awarded by using any procurement procedure established by the Grant Recipient, while respecting the rules and principles laid down in Sections 1 to 4 of this Part III.
- 5.2 Contracts with a value exceeding NOK 500 000 shall be awarded by means of one of the following procurement procedures:
- a) **Open tender procedure:** In open procedures, any interested tenderer may submit a tender in response to a call for competition. The tender shall be accompanied by the information for qualitative selection as requested by the Grant Recipient.
 - b) **Restricted procedure:** In restricted procedures, any tenderer may submit a request to participate in response to a call for competition by providing the information for qualitative selection as requested by the Grant Recipient. Only those tenderers invited to do so by the Grant Recipient following its assessment of the information provided may submit a tender. The Grant Recipient may limit the number of suitable candidates to be invited to participate in the procedure.
 - c) **Competitive procedure with negotiation:** In competitive procedures with negotiation, any tenderer may submit a request to participate or a tender in response to a call for competition by providing the information for qualitative selection as requested by the Grant Recipient. Tenderers may submit an initial tender, which shall be the basis for subsequent negotiations. The minimum requirements and the award criteria shall not be subject to negotiations.
- 5.3 Where the Grant Recipient does not launch an open tender procedure, it shall justify and document in writing the choice of tenderers that are invited to submit an offer.
- 5.4 Deviations from the procedures listed in Section 5.2 are limited to the situations listed in Section 7 of this Part III.

6 PUBLICATION OF PROCUREMENT NOTICE

- 6.1 The following shall apply with respect to publication of the procurement notice:¹

¹ Definitions of different types of contracts and procedures can be found in Directive 2014/24/EU.

7 USE OF NEGOTIATED PROCEDURE WITHOUT PRIOR PUBLICATION

7.1 The Grant Recipient may use a negotiated procedure without prior publication in the following cases:

- a) if any of the circumstances set out in Article 32 of Directive 2014/24/EU are present;
- b) for purposes of humanitarian aid and civil protection operations or for crisis management aid in a crisis that has been formally recognised by and for the time period declared by Norad;

 1) TNC is concerned that currency fluctuations will affect TNC's ability to fulfill the grant's scope of work during the term of the grant. TNC would like to include in any funding agreement awarded from this proposal, certain protections regarding this issue.

2) Should there be unused funds remaining at the end of any one calendar year while the award is active, TNC shall be allowed to carry forward those unused funds in the next calendar year's budget and will promptly inform NORAD how it plans to increase its budget and spend down carryforward funds into the next funding year. If there are unused funds remaining at the end of the award period, TNC shall return the unused funds to NORAD.

Notes:

- 1) TNC is concerned that currency fluctuations will affect TNC's ability to fulfill the grant's scope of work during the term of the grant. TNC would like to include in any funding agreement awarded from this proposal, certain protections regarding this issue.
- 2) Should there be unused funds remaining at the end of any one calendar year while the award is active, TNC shall be allowed to carry forward those unused funds in the next calendar year's budget and will promptly inform NORAD how it plans to increase its budget and spend down carryforward funds into the next funding year. If there are unused funds remaining at the end of the award period, TNC shall return the unused funds to NORAD.

Annex C. Standardised reporting information- results framework for the Climate and Forest funding to civil society 2016-2020

As described in the call for proposals, three overall outcomes have been defined for this grant scheme. During the five-year grant period, Norad will aim to systemise and aggregate some of the portfolio's total achievements. This is important in order to communicate the progress being made by this civil society portfolio as a whole during the five-year period. Therefore, we have standardised some reporting information, on which we believe that several organisations will be able to report.

We kindly ask all organisations to integrate all the relevant standardised reporting information into your results framework. This means that we expect all applicants to submit your own results framework that includes *all relevant* standardised reporting information described in this appendix.

The results framework will constitute the foundation for the annual and final reports from each organisation. This means that each organisation will report on its individually decided results framework and the standardised reporting information. Based on the organisations' reports, Norad will be able to systemise and aggregate the standardised reporting information.

Outcomes, clarifications and standardised reporting information

Outcome 1: Incentives to achieve REDD+ efforts are established through the new international climate regime and/or other climate, environment and development funding streams.

Clarifications of concepts:

Incentives: Results-based funding, access to funding/loans

Actors: The actors referred to in the outcome are countries and jurisdictions on a sub-national level.

REDD+ efforts: Reducing emissions from deforestation and forest degradation in developing countries; and the role of conservation, sustainable management of forests and enhancement of forest carbon stocks in developing countries.

Did your project contribute to REDD+ funding being pledged/received at a global level and/or national and/or sub-national level in the targeted developing countries during the year reported on? Please specify the details below.

1.1 : Amount (USD) pledged/received, your project's contribution: Please describe as short as possible how your project has contributed to the change in the REDD+ amount pledged/received during the year reported on:

1.2: Amount (USD) pledged/received: Please provide the following details on the REDD+ funding being pledged/received:

Funding pledged globally (USD)									
Funding pledged by targeted donor country (USD)									
Funding received by targeted developing country (USD)									

Please feel free to add rows in the table if necessary.

Bh B

Outcome 2: Governments in targeted developing countries have implemented REDD+ related policies, measures and safeguards, such as policies for green growth, sustainable livelihoods, land use-planning, the rights of indigenous peoples and local communities and women's rights.

Clarifications of concepts:

- **REDD+ related policies and measures:** A policy may be a plan, strategy, practice that is formally agreed upon and announced. A measure may be the operationalisation of a policy, but it may also be detached from formal policies. Policies and measures are widely defined, and the grant recipients will have to define the country and the type of REDD+ related policy and measures they are trying to influence/get implemented. Examples are green growth, sustainable livelihoods, land use-planning, the rights of indigenous peoples and local communities and women's rights e.g. related to tenure, access to land and participation in REDD+.
- Norad recognises that implementation of policies, measures and safeguards is a dynamic process that changes slowly over time. However, we are still interested in the progress towards the full implementation of policies/measures/safeguards. Therefore, the standardized reporting information below describe steps on the way towards full implementation of a policy measures/safeguards.
- Pilot projects and/or policies on a jurisdictional level may also be regarded as steps on the way to have the policy/measures/safeguards implemented.
- Norad recognises that a single project might not contribute to a policy/measure/safeguard being implemented. However, the efforts of the portfolio as a whole might have this effect over time.
- Please note: In order to list policy changes, you or your partner(s) should have implemented actions/activities that have significantly contributed to the change. You should not include policy changes happening previous year, even if you contributed to such change.
- **REDD+ safeguards:** The 7 safeguards agreed in Cancun 2010. Please see 2.2 for the full list.

13

- o **Targeted developing countries:** As of March 2015, the targeted developing countries are Brazil, Indonesia, Guyana, Ethiopia, Vietnam, Ecuador, Myanmar, DR Congo, Peru, Colombia and Liberia.

Did your project contribute to governments' implementation of REDD+ relevant policies and/or measures in the targeted developing countries during the year reported on? Please specify the details below.

2.1 Your project's contribution: Please describe as short as possible how your project has contributed to the implementation process during the year reported on. This may also include preparatory work and measures for increased participation of certain groups, capacity building etc.

2.1.a: Scale: Level of implementation of REDD+ related policy/measure

1. There is no REDD+ related policy/measure in place to address the area concerned.
2. The targeted government explores a potential REDD+ related policy/measure. This stage may include feasibility studies, needs analysis etc.
3. The targeted government adopts/agrees on a REDD+ related policy/measure. This stage describes a formal decision on implementing a policy/measure.
4. The targeted government develops a REDD+ related policy/measure. This stage may include policy-planning, timelines, participation of stakeholder groups etc.

BM B

5. The targeted government initiates the implementation of a REDD+ related policy/measure. This stage may include budget allocations, capacity building of relevant professionals etc.
6. The targeted government implements and enforces a REDD+ related policy/measure. This stage may include the execution of policies/measures with observed changes on the ground.

BM B

Outcome 3: Private sector actors have implemented social and environmental policies and practices that reduce the pressure on forests, and are engaged in global public private partnerships to reduce deforestation.

Clarifications of concepts:

- **Private sector actors:** producers, traders, investors, financial institutions in targeted deforestation related commodities
- **Global public private partnerships:** Regional and national public private partnerships may be steps towards reaching global public private partnerships.
- **Engaged:** requires a partnership with one or more government entities. It is not sufficient that governments are informed about the efforts of private sector actors. Rather, governments must be active partners for this goal to be reached.
- Although this outcome is twofold, both elements must be in place to fulfil the outcome. To ensure real and long-term effects on reducing deforestation, private companies must also engage with public authorities.

Did your project contribute to private actors' implementation of social and environmental policies and practices that reduce the pressure on forests, and are they engaged in global public private partnerships to reduce deforestation during the year reported on? Please specify the details below.

3.1 Implementation of social and environmental policies and/or practices and private-public partnerships, your project's contribution: Please describe as short as possible how your project has contributed to the reported change during the year reported on.
